Product Description

Custom Made Aluminum Heatsink / Radiator Extrusion Profiles , LED Heat Sink

The aluminium heat sink is a type of heat transfer components that absorb and dissipate the heat from electronic or mechanical devices, helping to keep that device at the proper temperature. It is widely used in industrial and commercial electronic devices.

Hentec is one of the most famous heat sinks manufactures in China, we keep improving aluminium extrusion profile technology and make it possible to produce high-performance aluminium heat sinks for cooling mechanisms. Aluminium heat sinks are designed to maximize the surface area in contact with the coolant fluid and cool air. and that need a combination of greater strength and lighter weight, aluminium extruded heat sink make it with a thinner thickness, a narrow tolerance, and higher thermal conductivity.
