Fireproof Aluminium Bead Core Composite Panel Lattice Wave Non Combustibility

Basic Information

. Place of Origin: China MetalPlus . Brand Name: CA,CE · Certification: Minimum Order Quantity: 1 ton

Packaging Details: Ep paper ,kraft ,pallet

Delivery Time: 20days T/T ,L/C • Payment Terms:

• Supply Ability: 100 000ton each month

Product Specification

• Product Name: Aluminium Core Composite Panel

· Application: Construction • Material: Aluminum **PVDF** Paint Suface Treatment:

1.2*2.5m Or Customized · Size:

Customized • Logo:

Fireproof Aluminium Bead Core Composite • Highlight:

Panel

non combustibility Aluminium Core Composite

, Ultra thin Aluminium Core Composite Panel

Product Description

Fireproof Aluminium Bead Core Composite Panel / Aluminum Lattice Wave CoreComposite Panel

Features

Light weight:

With the innovation of core technology, 4mm thickness Aluminium Core Composite Panel has only 3.6kg/m2 weight which is lighter than other materials with the same rigidity. It saves cost in transportation and labor.

Fireproof performance

This structure assures the panel of non-combustibility and makes it more reliable and popular in all façade applications, especially in USA (NFPA285), UK (BS 476-4 standard) and Australia (AS1530.1 standard) where there is a higher requirement and demand on fire retardancy.

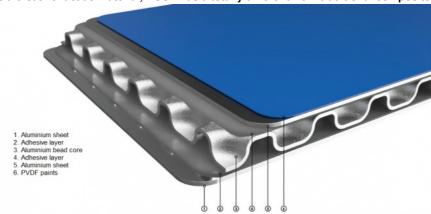

Formability:

Aluminium Core Composite Panel is convenient to be cut and grooved and less wearing on routers. Therefore, it saves your budget and time. It takes on many different shapes and its perfect formability does not affect its stability or flatness.

Environment friendly:

Being a member of our earth, we have the responsibility to protect our homeland. Our corrugated aluminium core of Composite panel is 100% recyclable. Also there is no pollution during the production and application.

As a creative facade material, ACCP has a totally different from traditional composite panels:

Aluminium Core Composite Panel

Advantage

Lighter than aluminum solid panel Much cheaper than aluminum honeycomb panel More durable than aluminum corrugated panels Flatter than normal composite panel

Strength

Easy Process

grooving and bending

easy tools is enough

grooving 1

grooving 2

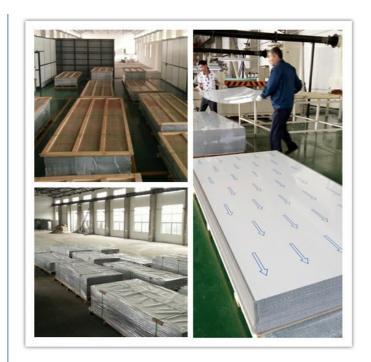

- **ACCP Application**1. Exterior decoration of building curtain wall
- 2. Building interior wall decoration3. Renovation and decoration of old buildings
- 4. Wall panel and ceiling decoration
- 5. Identification plate
- 6. Ship, high-speed rail, aircraft interior
- 7. Ultra-thin stone backing board
- 8. Modern furniture decoration

Continuous Production
