

Electrophoresis Aluminum Window Door Profile

Basic Information

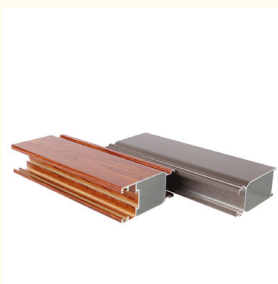

Product Specification

- Description: Aluminum Window/Door Extrusion Profiles
- Material Thickness(t): T=1.0 / 1.2 / 1.4mm
- Material: Aluminum Alloy 6063, 6061
- Annealing Treatment: T5, T6
- Color: Silvery, Green, Grey, Black, White, (RAL Series) etc.
- Surface Treatment: Mill Finish, Anodized, Powder Coated, Electrophoresis, Sand Blasting Etc. and Depend On Customer's Demand.
- Shape: Square, Round, Flat, Oval, And According To Customer's Drawing.
- Length: Normal Length 6m Or In Customer's Order
- Usage: Building, Production Line, Decoration, Industrial, Transportation, Curtain Wall Door And Window, Etc.
- Package: 1. PE Foam For Each Aluminum Profile ; 2. Wrap With Shrink Film Exterior; 3. Packed According To Customer Request

Product Description

Premium Aluminum Extrusion Profiles

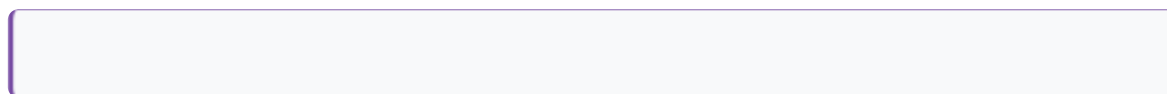

MetalPlusIndustry Co., Ltd stands as the premier Asian aluminum factory, offering the world's most extensive range of Aluminum Windows, Doors, and Curtain Walls. With a top-ten market share in China, we provide a complete, vertically integrated production chain—from raw extrusion to finished architectural products. We specialize in advanced deep processing including CNC drilling, milling, de-burring, chamfering, stretch bending, and welding.

Key Advantages & Applications

Versatile Performance: Colorful products with various mechanical properties to suit any architectural style.

Full-Service Production: Complete chain from extrusion to specialized CNC deep processing.

Broad Industry Utility: Ideal for building construction, industrial production lines, decoration, transportation, and curtain wall systems.
