

Customized Aluminum Extruded Door and Window Profile

Basic Information

Product Specification

- Item Name: Customized Aluminum Extruded Door And Window Profile
- Material Grade: 6063, 6061
- Temper: T4, T5, T6
- Surface Treatment: Mill Finish, Anodizing, Powder Coating, Electrophoresis, wooden Grain, etc.
- Color: Brown, Red, White, Champagne Or Customized
- Normal Powder Coated Thickness: 60-100 μm
- Normal Anodizing Thickness: 10-15 μm
- Shape: Square, Round, Hollow, Triangle Or Customized
- Deep Processing: Cutting, Drilling, Punching, Bending Etc.
- Design: 1. Designers In Design And Development Department 2. Auto CAD, 3D, AI, SLD, PRT. IGS, DXF, STEP Etc.

Product Description

Customized Aluminum Extruded Door and Window Profile

Our high-performance aluminum profiles are engineered for durability and aesthetic excellence. Designed for modern architecture, these profiles offer a lightweight yet robust solution for high-quality door and window manufacturing.

Key Advantages:

Lightweight & Strong: High structural integrity with easy handling.

Corrosion Resistant: Naturally resistant to rust, mildew, and insect damage.

Longevity: Maintains appearance over time, reducing maintenance costs.

Time-Saving: Designed for efficient fabrication and convenient installation.

Product Attributes**Material Grades**

6063, 6061

Temper

T4, T5, T6

Available Colors

Brown, Red, White, Champagne or Customized

Surface Treatment

Anodizing, Powder Coating, Wooden Grain, etc.

Technical Specifications

Powder Coated Thickness	60-100 μ m
Anodizing Thickness	10-15 μ m
Shape Options	Square, round, hollow, triangle or Customized
Deep Processing	Cutting, drilling, punching, bending
Design Support	Auto CAD, 3D, AI, SLD, PRT, IGS, PDF
Quality Control	Site inspection, Pre-shipment testing
