

## 7150 Standard Aluminium Profiles Solid Round Bar PVDF Coating

### Basic Information

### Product Specification

- Highlight:

7150 standard aluminium profiles,  
PVDF Coating standard aluminium profiles,  
7150 standard aluminum extrusion profiles

## Product Description

### Standard Aluminum Extruded Profiles

Standard aluminum extruded profiles—including round tubes, flat bars, angles, hexagonal shapes, channels, T-slots, and beams—serve as the fundamental building blocks for diverse industrial sectors. These profiles are engineered for lightweight strength, corrosion resistance, and design versatility, making them an indispensable solution for construction, transportation, machinery, electronics, and consumer goods.

#### Key Advantages

**Versatile Geometry:** Wide range of shapes including T-slots, beams, and tubes.

**Superior Material Properties:** Excellent strength-to-weight ratio and corrosion resistance.

**Ease of Fabrication:** Designed for efficient assembly and structural integrity.

**Industrial Adaptability:** Suitable for high-demand applications in construction and machinery.

### Product Attributes

#### Material Alloys

6063, 6061, 6005, 6060, 6082, 2A12, 2024, 7075, 7055, 7150

#### Temper

T5, T6, T66

#### Surface Finish

Anodizing, Powder Coating, Electrophoresis, PVDF Coating

#### Applications

Construction, Industrial

#### Services

OEM & ODM Available
